Assignment 4

06 September 2024   13:27

Create one Employee class, Mention one instance, create methods in it and create instance and reference in it.
=>

```java
package org.example;
import java.util.Scanner;

class employee{
    private String name;
    private int emp_id;
    private float salary;
    private String address;

    void accept_data(){
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter name   :       ");
        name = sc.nextLine();
        System.out.print("Enter emp_id         :       ");
        emp_id = sc.nextInt();
        System.out.print("Enter salary  :       ");
        salary = sc.nextFloat();
        sc.nextLine();
        System.out.print("Enter address        :       ");
        address = sc.nextLine();
    }

    void print_data(){
        System.out.println("employee name          :       " + this.name);
        System.out.println("employee emp_id        :       " + this.emp_id);
        System.out.println("employee salary        :       " + this.salary);
        System.out.println("employee address       :       " + this.address);
    }

}

public class Program {

    public static void main(String[] args) {
```

```
        employee emp = new employee();

        emp.accept_data();
        emp.print_data();

    }

}
```

```
Enter name      :       Abhay
Enter emp_id    :       1234
Enter salary    :       2000000
Enter address   :       Ahmednagar
employee name           :       Abhay
employee emp_id         :       1234
employee salary         :       2000000.0
employee address        :       Ahmednagar
```
